

REPORT APL-027, DEPARTMENT OF LABOR MISMATCHED REQUEST

The APL-027 reports cases which MDOL located a wage report or claim record based on the social security number submitted but which failed the APL system name comparison edit. A mismatch is reported when the first four positions of the last name of the absent parent as supplied by the requestor do not match the employee or claimant name as listed on the MDOL records. The APL-027 contains the same record data as the APL-013. See Exhibit 1 for description. The report is organized by requestor, county, and district if any and then alphabetically by absent parent name.
